

American Cancer Society
California Division, Inc.

Legislative Scorecard

2009

THE OFFICIAL SPONSOR OF BIRTHDAYS.™

Cancer is a Public Policy Issue

In 2009, cancer will have claimed the lives of more than 54,400 Californians and affected countless families, friends, and loved ones. One out of every two Californians born today will hear the words “you have cancer” in their lifetime. One out of five will succumb to the disease. Despite the advancements in education, screening and treatments, cancer is still the second-leading cause of death in California.

More can and must be done to help current cancer patients decrease risk and protect future generations from the pain and suffering associated with this disease.

The public expects the government to play a constructive role in this effort. In fact, people rate cancer the number one disease the government should address. This concern likely stems from the reality that this disease is the one they are most likely to face personally.

Every day, legislators in Sacramento have the opportunity, through their votes, to address that public concern and make exponential progress in the fight against cancer. The California Division of the American Cancer Society has sponsored and supported legislation to promote beneficial policies, laws, and regulations that will continue our progress toward a cancer-free society.

This legislation guide provides an accounting of the progress the state has made for California in 2009 and how each individual legislator contributed to the effort.

Please note: The American Cancer Society does not endorse or oppose candidates for elective office or political parties. This record of votes is strictly non-partisan and is not meant to convey support or opposition to any legislator. As legislators often cast hundreds of votes in a year, there are inherent limitations in attempting to evaluate a legislator solely on the basis of a few selected votes. Other important work includes unrecorded matters such as performance on committees and constituent service.

Scorecard Methodology

What source does the American Cancer Society use to accredit votes?

The vote information used to create this scorecard was taken from the public vote record, which can be found at the official site for California legislative information: www.leginfo.ca.gov.

Which votes were counted?

Only the final floor votes were counted for each chamber of the Legislature because this was the final input given by each legislator on the final version of the bill.

Why are previous floor votes or committee votes not counted?

By focusing on final floor votes, variables associated with voting during the preliminary legislative process are eliminated. As a bill moves through committees and between the chambers of the Legislature it is often amended. Previous floor votes and committee votes are indicative of a legislator's position on a bill that may have been altered several times before he or she took a final position on a bill.

How are votes represented in the scorecard?

The votes are scored by indicating either a check (✓) for a vote in accordance with the American Cancer Society position, an X (✕) for a vote against the Society position, an NV (nv) for no vote due to absence or desire to abstain, or a blank which indicates that the legislator did not hold office at the time of the vote.

How are Governor Schwarzenegger's actions represented in the scorecard?

Actions the governor took in accordance with the American Cancer Society position are marked with a check (✓). Actions that went against the Society position are marked with an X (✕).

2009 Scorecard Legislation

ACCESS TO CARE

AB 2 (De La Torre)

Would have required the Insurance Commissioner and the Department of Managed Health Care to approve and review health insurance policy cancellations/rescissions before insurance companies or health plans cancelled them. AB 2 would have increased access to care by further protecting consumers from inappropriate policy rescissions.

American Cancer Society Position: SUPPORT

Outcome: Vetoed

AB 56 (Portantino)

Would have required that insurers and health care services inform enrollees about the recommended timelines for breast cancer screening services. It also would have expanded required mammography screening coverage for plans that currently have less stringent coverage requirements than screening guidelines recommend. This bill would have ensured that more women receive access to essential screening services and would have increased early detection and survival rates.

American Cancer Society Position: SUPPORT

Outcome: Vetoed

AB 359 (Nava)

Will require digital mammography screening to be covered by the state's breast cancer early detection program (Every Woman Counts EWC) when analog mammography screening services are not available. Currently, EWC offers breast cancer screening services to uninsured women over forty, but only covers analog mammography. As radiology facilities transition to digital mammography, EWC's inability to pay for digital mammography screening will create an access issue. This bill will allow EWC to continue its mission of screening women as the industry standard for screening evolves.

American Cancer Society Position: SUPPORT

Outcome: Signed into Law

AB 366 (Ruskin)

Would have required consideration of the costs associated with orthopedic implantation when the State and hospitals negotiate the amount paid for services under Medi-Cal. Orthopedic implantation is used for treatment of bone cancers to avoid amputation. In the past, amputation was the only option, but now 90 percent of limbs can be saved. The current reimbursement rate for orthopedic implantation does not account for the costs associated with the procedure. This could potentially discourage the pursuit of orthopedic implantation for Medi-Cal clients. AB 366 would have supported the establishment of a payment system that treated the two procedures more equitably.

American Cancer Society Position: SUPPORT

Outcome: Held on the Senate Inactive File

SB 148 (Oropeza)

Will require mammography facilities that receive notices of violation of standards to post the violation notice where it is easily visible to patients. Ensuring the availability of this information will make women better informed about the safety and compliance record of mammography facilities and deficiencies that can impact the quality of the mammogram.

American Cancer Society Position: SUPPORT

Outcome: Signed into Law

SB 158 (Wiggins)

Would have required health insurance providers that cover treatment for cervical cancer to also provide coverage of the HPV vaccine. Insurance coverage for the vaccine is necessary to ensure that people have access to this important prevention tool. The Society is excited about the remarkable potential to prevent cancer that the vaccine represents and believes coverage of the vaccine is essential to maximizing vaccination.

*American Cancer Society Position: SUPPORT
Outcome: Vetoed*

SB 161 (Wright)

Would have required health care service plans and insurance policies that provide coverage for cancer chemotherapy treatment to provide equivalent coverage for oral chemotherapy and intravenous chemotherapy. Many insurance plans categorize oral chemotherapy as a medication, therefore subjecting it to exorbitant co-pays. SB 161 would have given cancer patients additional treatment options at an accessible cost, increasing their access to care and quality of life.

*American Cancer Society Position: SUPPORT,
CO-SPONSOR
Outcome: Vetoed*

ENVIRONMENT

AB 1404 (De Leon)

Would have made changes to the State's laws addressing global warming to encourage local air pollution mitigation efforts instead of allowing regulated entities to be given credit for greenhouse gas decreases achieved outside of California. Particulate pollution is a co-pollutant affiliated with greenhouse gases. It has been linked to significant damage to the lung's small airways and increased risk of dying from lung cancer. AB 1404 had the potential to decrease greenhouse gas emissions and the corresponding particulate pollution thus benefiting California communities. Those communities most severely affected by air pollution, namely low-income communities and communities of color, would have

particularly benefitted.

*American Cancer Society Position: SUPPORT
Outcome: Vetoed*

NUTRITION & PHYSICAL ACTIVITY

AB 627 (Brownley)

Would have authorized a statewide pilot program to implement enhanced nutrition and physical activity standards at participating child daycare facilities. In exchange, the state would offer higher meal reimbursement rates to those facilities. This program would help answer questions about what level of reimbursement would support improved nutrition and physical activity requirements in child care settings. One in three cancer deaths are related to poor nutrition and physical inactivity and nearly one in four children under the age of five is overweight or obese. This program would have encouraged healthy habits that support decreased cancer risk early in a child's life.

*American Cancer Society Position: SUPPORT
Outcome: Vetoed*

TOBACCO

ABx3 2 (Evans)

Would have increased the tobacco tax by \$1.50, as part of an overall budget package. The American Cancer Society supports increasing tobacco taxes because significant increases contribute to decreases in smoking and help prevent youth from ever starting to smoke. ABx3 2 and ABx3 39 contained identical language. The Assembly voted on ABx3 39, while the Senate voted on ABx3 2. These votes were the first time that all legislators recorded a vote on a tobacco tax in 16 years.

*American Cancer Society Position: SUPPORT
Outcome: Died in the Assembly without further action*

ABx3 39 (Evans)

Would have increased the tobacco tax by \$1.50, as part of an overall budget package. The American Cancer Society supports increasing tobacco taxes because significant increases contribute to decreases in smoking and help prevent youth from ever starting to smoke. ABx3 2 and ABx3 39 contained identical language. The Assembly voted on ABx3 39, while the Senate voted on ABx3 2. These votes were the first time that all legislators recorded a vote on a tobacco tax in 16 years.

American Cancer Society Position: SUPPORT

Outcome: Died in Senate without further action

SB 4 (Oropeza)

Would have made smoking a pipe, cigar, or cigarette on a state coastal beach or in a state park a punishable infraction. The Society has consistently advocated for smoke free beaches and other outdoor venues to reduce exposure to cancer causing secondhand smoke.

American Cancer Society Position: SUPPORT

Outcome: Held on Assembly Inactive File

SB 603 (Padilla)

Would have made changes to the state's tobacco retail licensing structure in an effort to decrease sales of tobacco to minors. This would have included an increased licensing fee and limitations on the type and location of businesses that could get a license. The Society supported the version of the bill that existed at the time of the Senate floor vote. Subsequent proposed amendments warranted reconsideration of the Society's position, which is not reflected in this scorecard.

American Cancer Society Position: SUPPORT

Outcome: Held in Assembly Committee on Governmental Organization

SJR 8 (Corbett)

Would have encouraged the Food and Drug Administration (FDA) to prohibit all sales of electronic cigarettes until the FDA has approved them for use. E-cigarette manufacturers are touting these devices as an alternative to smoking. The Society supported this resolution because e-cigarettes are a drug device that look like ciga-

rettes, contain nicotine, and have not yet been evaluated by the FDA. This resolution would have prevented the sale of electronic cigarettes until the FDA approved the product, thus, ensuring safety and efficacy.

American Cancer Society Position: SUPPORT

Outcome: Awaiting further action in Assembly Committee on Governmental Organization

AWARENESS & DISPARITIES

AJR 11 (Furutani)

Designated the week of April 19-25, 2009 as National Multicultural Cancer Awareness Week.

American Cancer Society Position: SUPPORT

Outcome: Passed

SCR 7 (Denham)

Designated March 2009 as Kidney Cancer Awareness month.

American Cancer Society Position: SUPPORT

Outcome: Passed

SCR 14 (Aanestad)

Designated September 2009 as Prostate Cancer Awareness Month.

American Cancer Society Position: SUPPORT

Outcome: Passed

SCR 22 (Steinberg)

Designated March 2009 as Colorectal Cancer Awareness Month.

American Cancer Society Position: SUPPORT

Outcome: Passed
